Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Part III DETAILED ACTION

1. This application has been examined, Claims 1,4,5 and 8 are pending in this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2625

2. Claims 1,4,5 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Nihei (U.S. Patent Number 6,891,634, cited in the Office action dated 2/24/06).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claim 1, Nihei discloses an image transmitting device (see Figs. 1-5) comprising combining process means for generating a composite image by joining a plurality of original images (column 8, lines 31-59), storing means for storing the composite image generated by the combining process means and the original images that the composite image comprises together with corresponding combining data required for generating the composite image (column 8, lines 31-59), and selection process means for executing a selection process that outputs one or more of the composite image, original images, or combining data as output data

Art Unit: 2625

based on an output destination device specified as the destination for image transmission (see Figs. 6-21, column 5, lines 11-49, and column 8, lines 31-59), wherein the selection means executes the following: a selection process on output data predetermined based on the attributes of the output destination device (reads on figs. 4 and 6, which depicts that a printer can be selected based on attribute(s), capability of printing big files and the speed at which files are printed).

Regarding claim 4, Nihei discloses the image transmitting device discussed above in claim 1 and further teaches that the selection process means executes the selection process based on user specifications (see Figs. 6-21, column 5, lines 11-49, and column 7, line 21-column 8, line 59).

Regarding claim 5, Nihei discloses an image transmitting method comprising a composite process step for generating a composite image by joining a plurality of original images (column 8, lines 31-59), a storing step for storing the composite image generated by the combining process means and the original images that the composite image comprises together with corresponding composite data 31-59), and a selection process step for executing a selection process that outputs one or more of the composite image, original

images, or combining data as output data based on an output destination device specified as the destination for image transmission (see Figs. 6-21, column 5, lines 11-49, and column 8, lines 31-59) wherein the selection means executes the following: a selection process on output data predetermined based on the attributes of the output destination device (reads on figs. 4 and 6, which depicts that a printer can be selected based on attribute(s), capability of printing big files and the speed at which files are printed).

Regarding claim 8, Nihei discloses the image transmitting method discussed above in claim 5, and further teaches that the selection process in the selection process step is executed based on user specifications (see Figs. 6-21, column 5, lines 11-49, and column 7, line 21-column 8, line 5).

Conclusion

3. Applicant's added features to the claims have been addressed above.

Art Unit: 2625

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gabriel I. Garcia whose telephone number is (571) 272-7434. The Examiner can normally be reached Monday-Thursday from 7:30 AM-6:00 PM. The fax phone number for this group is 571-273-8300.

Art Unit: 2625

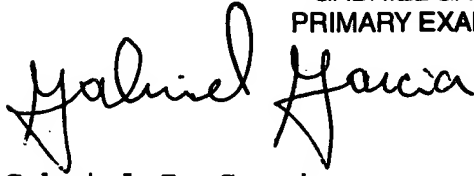

CENTRALIZED DELIVERY POLICY: For patent related correspondence, hand carry deliveries must be made to the Customer Service Window (now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314), and facsimile transmissions must be sent to the Central FAX number, unless an exception applies. For example, if the examiner has rejected claims in a regular U.S. patent application, and the reply to the examiner's Office action is desired to be transmitted by facsimile rather than mailed, the reply must be sent to the Central FAX Number.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (571) 272-2600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (**PAIR**) system Status information for published applications may be obtained from either Private **PAIR** or Public **PAIR**. Status information for unpublished applications is available through Private **PAIR** only. For more information about the **PAIR** system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private **PAIR** system, contact the Electronic Business Center (**EBC**) at 866-217-9197 (toll-free).
